This toolkit is designed to help you communicate an important health plan benefit, preventive services, to your employees. We want to make it easier for you to help your employees make choices to support a healthy lifestyle. In this toolkit, you’ll learn more about the importance of having a primary care provider, our preventive care benefits, as well as communication tools to support a wellness campaign.

Our Health Management Consultant team is here to help. Contact your Health Management Consultant or Account Manager for more information.

Important Note: This toolkit is designed for fully-insured groups with more than 50 employees enrolled in Providence Health Plan.

IDENTIFY:
Determine Organization’s Interest & Need
Incorporate wellness strategies that will be valuable for your organization.

IMPORTANT OF PREVENTIVE CARE
Regular visits to primary care providers help keep us in good health. Yet many people aren’t aware about the preventive care they need. According for the Centers for Disease Control and Prevention, Americans get preventive services at only half the recommended rate\(^1\). In a recent poll, 26% of adults and nearly 50% of millennials reported that they do not have a primary care provider\(^2\).

Employee health is good for business
Three conditions that cost employers the most – diabetes, heart attacks and high blood pressure – can often be prevented or caught early and treated successfully\(^3\). And when employers provide paid time for doctor appointments, it shows employees that the organization values their well-being, which can improve employee retention rates and may help the bottom line over the long term.

Preventive care helps employees stay well
Preventive benefits are designed to help detect potential health concerns early, which can ward off more serious health issues and avoid high medical expenses. Consider that 7 out of 10 deaths are attributed to chronic illnesses, such as diabetes and heart disease, which are preventable and/or manageable with appropriate healthcare\(^1\). If everyone saw a primary care provider first for their care, it would save the U.S. an estimated $67 billion every year\(^4\).

Primary care providers ensure patients get the right care, in the right place, by the most appropriate provider, and in alignment patient’s preferences. People who have a primary care provider have 33% lower healthcare spending over their peers who only see specialists\(^5\). Access to primary care helps keep people out of emergency rooms, where care costs at least four times as much other outpatient care\(^6\).

Even if an employee is healthy today, encourage them to use their preventive benefits to stay that way. They are available to help you make the most of your life.

ELIGIBILITY
Preventive services are typically covered in full when you receive care from an in-network provider. Even if a member hasn’t met their deductible, the health plan picks up 100% of the bill for these services.

These preventive services are generally covered at no cost:
• Routine check up such as physical exams and well-woman visits
• Screenings and tests for high blood pressure and high cholesterol
• Immunizations and vaccines to prevent illness like the flu

Coverage for preventive services is based on the diagnosis code billed by the provider. Covered services also vary by age and risk factors. Check your member materials for specific benefit information.

UNDERSTANDING YOUR ORGANIZATION’S NEED
Partner with your Account Manager and Health Management Consultant to review your organization’s Group Engagement Dashboard report, which includes utilization of preventive screenings based on health care claims data.

LEAD BY EXAMPLE
Remember, you’re an employee too. Lead by example by taking advantage of your preventive benefits.

CONSIDERATIONS
• What is the utilization rate of preventive screenings for your employees?
• How can you use the social networks in your organization to promote preventive care?
• How can your workplace support the campaign?
• How can you make it easy for employees to access preventive care?
DESIGN:
Campaign Planning Tools & Materials
Ensure a variety of resources are available to support your wellness initiatives.

COMMUNICATION TIPS
Here are a few tips to help spread the word:
• Modify the communication materials so they resonate with your employees and the organization’s culture
• Use a variety of communication methods
• Get the messages to leaders – supervisors, wellness committee members, wellness champions – and make it easy for them to share the information
• Make it social. Use an organization-wide event – like an all-staff meeting, health fair or biometric screening event – to help launch the campaign
• Make sure employees understand the purpose of the campaign and how the campaign will benefit them
• Consider tying it to an incentive or promotion

COMMUNICATIONS PLAN
A communications plan is your roadmap for informing your employees about a new initiative and determining when and how you intend to communicate it. Developing a communications plan can increase employee awareness, increase program participation, and ultimately improve health-related behaviors. As you develop your communications plan for this campaign, it’s important to:
• Determine the campaign dates
  • Consider promoting preventive services in alignment with our targeted outreach. Learn more here.
• Create a calendar for communication material dates - announcement date, launch date, when materials will be dispersed to leaders, when materials will be posted, etc.
• Familiarize yourself with the materials
• Customize materials with your branding and incentive
• Remember to include how you’ll measure success – including participation goals
ENAG: COMMUNICATION TOOLS

Regularly communicate with employees in relevant and meaningful ways.

To support your communication efforts, we’ve developed materials to help you drive program engagement. Any of these materials can be customized by importing the file into design software, and then adding your organization’s name or logo. These resources are found in the Appendix of the toolkit.

**Flyer**
8.5" x 11" .pdf

Stay well with preventive care

A primary care provider is good for your health and well-being:
- Preventive care leads to better health outcomes
- Enhanced patient-provider relationship and health transparency
- Improved management of chronic conditions
- Timely referrals to specialized care when needed
- Lower cost of care and reduction in hospital visits
- Greater overall healthcare experience

Find in-network primary care providers at ProvidenceHealthPlan.com/ProviderDirectory.
5 reasons to have a primary care provider

No matter how healthy you are, you really should have a primary care provider.

You’ll stay healthier
Numerous studies show that patients who see their primary care provider (PCP) regularly are less likely to be hospitalized or have surgery.

You’ll save money
Preventive care is covered in full when you see an in-network provider. By seeing your PCP regularly, you’re more likely to keep issues like high blood pressure at bay which will help avoid costly prescriptions later on.

You’ll save time
Your provider may help with physical exams, immunizations, lab tests, and other types of screenings. You can schedule to have your primary care physical with your annual women’s health check-up.

Your PCP is your health care hub
Your provider coordinates care with other health care professionals to ensure you receive the right care, at the right time, at the right cost.

Your PCP is your trusted partner
Your provider is a trusted source for health information and helps you navigate the health system by providing medical advice to help you make informed decisions.

Find an in-network primary care provider at ProvidenceHealthPlan.com/ProviderDirectory. Remember, primary care providers practice internal medicine, family practice, pediatrics or obstetrics & gynecology.
Your provider may help with physical exams, immunizations, lab tests, and other types of screenings. Look at your benefits to see what preventive care is covered in full by your health plan.

To find a doctor or schedule an appointment, go to: ProvidenceHealthPlan.com | 800.878.4445
Think about your access to care. Consider the communication methods available to contact your provider, your ability to access your health records, and your provider’s schedule availability.

Think about logistics and your preferences. Consider things like location, office hours, gender, primary language, and cultural background.

Think big picture. Research the provider’s philosophy of patient care, their specialty focuses, and their areas of interest.

Conduct a quality check. Research your provider’s education, certification, and performance history. You can also check your health plan to see which providers have a special designation for quality and cost efficiency.

Determine which providers are “in-network” for your health plan. You will generally pay less out of pocket costs because your health insurance has negotiated special rates with these providers.

Be sure you feel comfortable. You rely on your provider to help manage your care; your provider should listen to your concerns, encourage you to ask questions and explains things in an understanding way.

Evaluate the environment. Take into account the environment of the office, the culture of the employees and organization, and the efficiency of your appointment.

FREQUENTLY ASKED QUESTIONS
Primary Care Provider

OVERVIEW
What is a primary care provider?
As you travel through life, a primary care provider is your expert companion. A primary care provider gets to know you and your health history and goals, helping you to make healthy progress year over year. A primary care provider evaluates your health regularly through checkups, screenings and examinations and is usually the first to notice developing health issues before they become urgent.

What kind of primary care doctor do I need?
You can choose from different types of primary care doctors, depending on your needs and preferences:

• Family medicine: family medicine doctor can care for your whole family.
• Pediatricians: Pediatricians specialize in children’s health – from birth to age 18.
• Internal medicine: Internal medicine doctors care for adults. They prevent, treat and diagnose diseases.
• OB-GYN: OB-GYN doctors specialize in women’s reproductive health. They are experts in things like pregnancy, birth, and menopause. They are able to provide screenings, like blood pressure and cholesterol, but you’ll still need a primary care doctor for whole-body issues, like mental health and respiratory conditions.

What’s included under the preventive care benefit?
Preventive services include vaccines; cancer screenings; blood pressure and cholesterol tests; and alcohol, tobacco and weight screenings.

Download a list of preventive services here. Preventive services may vary by things like age, gender, and risk status. Check your benefits if you have questions about your plan’s coverage.

What’s the difference between preventive and diagnostic care?
Diagnostic services help your provider diagnose your illness or health condition and decide on your treatment. Diagnostic services include things like treating an illness or injury, monitoring your current health condition or diagnosing a new condition.

How do I know how much my visit will cost?
Preventive care that is delivered by a contracted, in-network health care provider is covered in full under the U.S. Affordable Care Act. To verify the details of your preventive care coverage, log into your myProvidence to access your plan benefits and member handbook. If you don’t have a myProvidence account, registering for one is quick and easy.

A treatment cost calculator, located in myProvidence provides personalized information about the estimated costs of treatment, including possible exam and lab fees. You can also compare providers and medical facilities to make sure you’re getting the best care at the best price. the most of your health care dollars –hundreds and even thousands of dollars by comparing costs through this tool.
What if I receive preventive and non-preventive services in the same office visit?
You can have preventive and non-preventive services in the same office visit. Your office visit benefit may apply to the non-preventive part of your visit.

FINDING A PROVIDER
How do I find a primary care provider?
To find a health care provider start by looking in the provider directory located online at ProvidenceHealthPlan.com/ProviderDirectory. You may also contact customer service at 800-878-4445 for assistance finding a provider.

What should I consider when deciding if a provider is a good fit?
Your primary care provider must be someone you trust, with whom you feel a rapport. An ideal relationship with a primary care provider should be comfortable, with both patient and provider valuing one another’s thoughts and opinions. It’s a sound approach to ask your friends or family what they like about their own providers or turn to the Internet to see what other people in the community have to say. It’s always a good strategy to call the provider’s office and ask questions such as:

• Is your health insurance plan compatible with the provider? This may change during the year, so you should always ask.
• Is the provider accepting new patients?
• What is the providers treatment philosophy?
• Does the provider practice at the hospital of your choice?
• Is the office close to your home or your work and how will you get there?
• Will the provider personally visit you in the hospital?
• Is the provider part of a group of providers sharing offices?
• Who will see you if your provider is not available?
• If you have a medical condition, how much experience does the provider have in treating it?
• Are services such as sutures and X-rays referred to an urgent care facility or Emergency Room?
• Does your provider offer immunizations, like the flu shot in the fall?
• If you need a form filled out, does the provider require another office visit?
• Will the appointment times work with your schedule?
• Do you need a provider with extended, evening or special office hours?
• How long will it take to get an appointment?
• How long do appointments usually last?
• Can you make the appointment online or via smartphone app?
• If you call with a question, how soon does the office return your call?
• Is the office staff respectful and helpful?
• Can you communicate with the provider via e-mail?
• Can you access your medical records online?
• If you have limited mobility, are you able to get into the provider’s office, access the exam tables and scales, and get key information in ways that meet your needs?
• Does the provider speak your language or have an interpreter available?
Providence Health Plan’s online provider directory makes it easy to find providers, pharmacies and facilities. Providence offers access to nearly a million providers nationwide.

1. **Find in-network providers, pharmacies and facilities:**
   - Visit our website at: www.ProvidenceHealthPlan.com/providerdirectory
   - or click ‘find a provider’ from the Providence Health Plan home page

2. **Two ways to search**

   - **Search by Member ID**
     - Enter your PHP member ID number
     - Choose plan type
     - Choose provider network
     - From 25 miles
     - Enter city & state or zipcode
     - Click “Search”

   - **Search by Provider Network**
     - Not a Member Yet?
     - Browse networks without a member ID number
     - Select “Search by Provider Network”

For best results, search by member ID number (from your member ID card) and select “Search.”

Or, if you don’t have your member ID, select your type of plan and provider network, then select “Search.”

Find a provider online
3 Tailor your search
Search by Provider, place, name, keyword or location

- Find an in network doctor, clinic, pharmacy, or other provider

Select Provider type

- What type of doctor are you looking for?
- Primary Care Providers
- Specialists
- Routine Dental Services
- Mental Health/Chemical Dependency
- Family Medicine

Select type of service or location

- What type of Facility are you looking for?
- See All Facilities & Clinics
- Ambulatory Surgical Center
- CLINIC (E.G. Doctor's Office)
- Hospital
- Mental Health/Chemical Dependency Facility
- Urgent Care Clinic
- Pharmacies

4 Customize Results

Find a doctor - including specialists - by name

Filter results by:
- Type/Specialty
- Location
- Gender
- Languages spoken

- Select between providers, facilities or pharmacies.
- Click on the provider name for more detailed information, including years in practice.

Contact Customer Service for questions or assistance:
503-574-7500 or 800-878-4445 (TTY: 711)
8 a.m. - 5 p.m., Monday through Friday (Pacific time).
With Providence, you can choose from many types of care. This guide can help you decide which type to use in each situation.

**ProvRN**
(free)

Not sure if you need care? Just want advice about what to do next? Talk to a registered nurse by phone for free, 24/7.

- Always free, always there
- Call 800-700-0481 or 503-574-6520

**Express Care Virtual**
(free)

Need treatment, but have a fairly simple problem and want to stay home? Have a virtual visit with a provider from your phone, tablet or computer.

- Open 8 a.m. to midnight, 7 days a week
- Go to providence healthplan.com/virtualvisit

**Express Care Clinics**
($$

Need same-day treatment when it’s not an emergency? Want to be seen in person? Find a clinic in Portland, including inside many Walgreens.

- Same-day appointments, 7 days a week
- Visit providence expresscare.org

**Primary Care**
($$

Want to see someone who knows your health, but it’s not urgent? Have a chronic problem, need preventive care or follow-up? See your primary care provider.

- By appointment
- Call your primary care clinic

**Urgent Care**
($$$)

Know you need help right away, but don’t think you are in immediate danger? Urgent care can deal with things like minor cuts and burns, infections and more.

- Seen according to urgency of problem
- Visit an urgent care facility near you

**Emergency**
($$$$$

Think your life may be in danger? Maybe you have signs of heart attack, stroke, uncontrolled bleeding or unbearable pain? You need the E.R.

- Call 9-1-1
- Get a ride to the nearest hospital

* Beginning on 1/1/17, Express Care Virtual is free with most plans. HSA members must first meet their deductible. For more information about each service, please see the back.
If you ever think your life or well-being could be in serious danger, call 911 immediately.

**ProvRN**
ProvRN is great for getting advice about minor problems, or to determine if you need further care.
Maybe you aren’t sure whether your fever is high enough to need treatment, or you wonder how to treat a mild rash.

**Express Care Virtual**
Providence Express Care Virtual is great for things that need treatment, including a prescription, but don’t require hands-on care.
For example, maybe you have a sinus, ear or eye infection. Or a cough or rash that won’t go away. It’s like having Facetime with a doctor.

**Express Care Clinics**
Providence Express Care clinics are great for when you want to be seen by a person the same day.
Maybe you have a sprain, strain or bad headache. You could also have a minor wound or burn, or nausea and vomiting. These clinics are only available in the Portland metro area.

**Primary Care**
Primary Care is best when you want someone who knows you and your health.
Maybe you’re really not sure what the problem is (like fatigue) and you need your health care partner to investigate, or you have a chronic illness that you need help managing.

**Urgent Care**
Urgent care is best when you know you need help today, don’t want to make an appointment or don’t have an Express Care clinic nearby.
It’s best used for things like minor cuts and burns, ear, nose and throat problems, sprains and strains or stomach problems, to name a few.

**Emergency**
Emergency care is what you use when you feel you may be in danger.
It’s best for things like suspected heart attack, stroke, severe abdominal pain, poisoning, choking, loss of consciousness and uncontrolled bleeding.

ProvidenceHealthPlan.com
**ADULT PREVENTIVE SERVICES**

Use your preventive care benefits: These benefits are covered and available to help you stay well.

As a Providence Health Plans member, you and your enrolled dependents have access to preventive care services. For most members, many of these services are covered in full when you receive care from in-network providers. See your member materials for specific benefit information or call customer service at 503-574-7500 for more information.
