# Individual and Family plan rates for 2015

Several factors make up your monthly premium rate:

- Your age
- Whether or not you use tobacco
- The county where you live

To determine the premium for yourself as an individual, go to the rate sheet for the county in which you live, use your age and choose the plan that fits your needs.

To determine the premium for you and your family, go to the rate sheet for the county in which you live, choose the plan that fits your needs, then use the ages for each person to be covered. Add the premium amounts for each family member to determine your total. If you're covering more than three children under 20 years of age, only add the premiums for your first three children. There are no premiums for additional children.

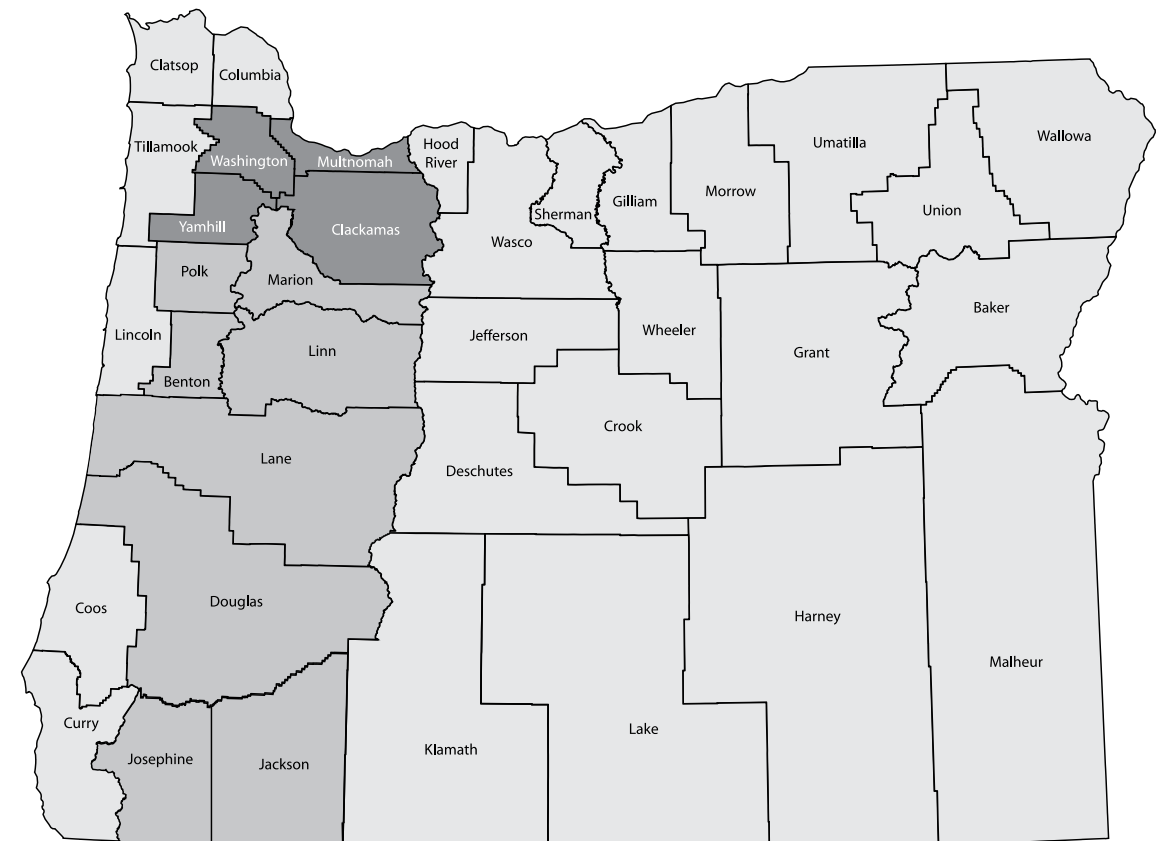

Tobacco use is defined as the use of tobacco products in any form an average of four or more times per week within the past six months.
